

**Community Development Advisory Committee (CDAC) Meeting Minutes
December 13, 2022**

In attendance: Prentice Grassi, Wilson Hess, Alexis Bennett, Lunar Windflower

The meeting began with introductions. Both Lunar and Alexis are interested in joining the CDAC.

We reviewed and approved the minutes from November 2.

Wilson went on to give an overview of the work the committee has done so far, This included an update on the status of the Community Resilience Partnership (CRP) proposal.

To date, the goals of the CRP funding would be to get a site assessment of the acreage comprising the "Cannery Lot." In order to complete the CRP application, the committee must identify potential site usage. Currently, the ideas on the table are:

1. A solar farm
2. Community use as a park and trail network

The committee may consider additional uses before the proposal submittal at the end of February.

Wilson talked about the development of the MBNA property in Belfast in the early 2000's, and how it acted as a catalyst for development in the city.

Before the next meeting, Lunar agreed to look into other solar projects, perhaps municipally owned, that are of a similar scale to the 1 acre installation we are considering here.

Alexis agreed to get in touch with Robyn Stanicki to get an update on the CRP.

The next meeting is set for Wednesday, January 4 at 6PM.

Respectfully submitted,
Prentice Grassi
